1. Claims 12, 13 and 16-24 are allowed in light of the amendment and the remark filed on 10/14/2008.

2. The following is an examiner's statement of reasons for allowance:

While the prior art of record issued to Kon (Vehicle Detectors, 1998) teaches a system and an associated method *for triggering at least one of (1) at least one deceleration device and (2) at least one output-determining actuator element of a vehicle propulsion system* (see page 63, third paragraph start from "In an example multiple detector system for detecting.....flow of traffic" and page 64, section 2.), *the device comprising: a first surroundings sensing device for providing longitudinal value-optimized measured values; a second surroundings sensing device for providing object lateral extension-optimized measured values* (see page 53, section 1.4, page 62, first paragraph and having more than one sensing device falls under design choice); *and an analyzer device for receiving output signals of the first and second surroundings sensing devices, and for using the measured values of both the first and second surroundings sensing devices for at least one of (a) object identification/verification and (b) triggering of at least one of (1) the at least one deceleration device and (2) the at least one output-determining actuator element of the propulsion system* (see page 52, section 1.3, page 63, third paragraph as noted above, page 87-88, section 3.17 and page 64, section 2. as noted above). However, the prior art of record fail to teach of fairly suggest a system and an associated method for triggering at least one of (1) at least one deceleration device and (2) at least one output-determining actuator element of a vehicle

propulsion system wherein one of: (a) the measured values of the second surroundings sensing device are used for at least one of verification and provision of additional information in analyzing the measured values of the first surroundings sensing device; and (b) the measured values of the first surroundings sensing device are used for at least one of verification and provision of additional information in analyzing the measured values of the second surroundings sensing device in combination with the other element and features of the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
